GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

U.S. - Univ. of Florida

Volume 10 No.1 January 26, 1967 Hyattsville, Maryland 20782

Grain prices advanced moderately in the October-December quarter reflecting the generally favorable feeding ratios and the high level of exports. However, prices declined in January. This was due in part to the realization of the record world wheat crop, slackening export interest and record crops of corn, soybeans and grain sorghum in this country. Despite the decline, prices the first three weeks of January were well above a year earlier. Stocks of feed grains on January 1 were 10 percent less than last year. Wheat stocks were the smallest since 1952 while soybean stocks were 17 percent above the previous high of a year earlier.

WHEAT ... prices fluctuated rather sharply during the first half of the 1966-67 season. No. 1 Hard Winter wheat at Kansas City climbed to around \$2.00 per bushel the middle of July and again early in September. Prices dropped to \$1.70 on October 4 and then gradually edged up to \$1.91 on December 1. The average for the first three weeks of January was \$1.78 which compares with \$1.64 a year earlier. Other classes showed similar price fluctuations with No. 1 Dark Northern Spring at Minneapolis averaging \$1.90 in January this year compared with \$1.75 last year. No. 2 Soft Red Winter at Chicago was \$1.73 in January 1967 as against \$1.71 in January 1966. Stocks of wheat in all positions on January 1 totaled 1,046 million bushels -- a drop of 290 million from a year earlier. Commodity Credit Corporation owned only 179 million bushels of wheat on January 1 as against 572 million a year ago. In addition 153 million were under price support or resale loan. Exports of wheat and flour totaled a record 437 million bushels the first half of the season -- 44 million more than a year earlier. Milling of wheat for flour at a little over 300 million bushels was about the same as last year. The quantity remaining for feed the first six months totaled 41 million -- well below the 95 million for the same months last season. Wheat supplies in Canada for 1966-67 totaled 1,267 million bushels, 105 million more than for 1965-66. Canadian exports of wheat and flour totaled around 250 million bushels, August through December this season, as against 275 million the same months of 1965.

RYE ... prices thus far this season averaged 8¢ per bushel above the same months a year earlier. However, prices in January at Minneapolis were 5¢ per bushel below a year ago. Rye stocks of 28.1 million bushels were 2 percent less than last year. Exports totaled about 2.0 million the first half of the season, slightly above the previous year. Consumption of rye for alcohol and milling the first six months were a little below last year. CCC-owned stocks of 8.2 million bushels were sharply above recent years.

CORN ... prices at the farm for the first three months of the season averaged 24¢ per bushel above a year earlier. However, with slackening export demand, market prices in January were only 8¢ per bushel above January 1966. Stocks of corn in all positions on January 1 totaled 3,663 million bushels, a

drop of 379 million from a year ago. Of the total stocks, CCC owned only 120 million bushels with 391 million outstanding under price support or resale loans. Exports of 136 million bushels the first quarter were sharply below the 193 million exported a year earlier. The quantity used for wet milling and alcohol was down slightly from last season. Around 1,057 million bushels of corn remained for feed the first quarter -- 150 million more than last year and 210 million above average. The number of grain consuming animal units fed in 1966-67 is currently estimated at 173.9 million compared with 167.4 million in 1965-66 and 169.9 the 5-year average. On this basis 6.0 bushels of corn were fed per animal unit the first quarter this season as against 5.4 last season and 5.0 bushels the average.

OATS ... prices at the farm for the first half of the season averaged 5¢ per bushel above a year earlier. Reflecting smaller supplies, market prices in January were about 4¢ higher than last year. Stocks of oats on January 1 totaled 660 million bushels -- 102 million less than a year earlier. Disappearance the first half of the season, mainly for feed, totaled 455 million bushels. This was a little above last year but well below average. Exports of 15.6 million bushels the first six months of this season compare with 22.3 million the same months of 1965-66.

BARLEY ... prices at the farm, July-December, averaged 5¢ per bushel above the same months of 1965. Market prices for choice malting barley at Minneapolis in January were 2¢ higher while feed barley averaged 2¢ lower. Stocks in all positions on January 1 at 291 million bushels were the smallest in 10 years and 10 million below last year. Disappearance of 207 million bushels the first half of the season was slightly above the previous season but 6 percent below average. Exports of 28 million compare with 38 million exported the first half of the previous season. Industrial usage, mainly for beer, was about at last year's level while consumption for feed totaled 128 million as against only 110 million a year earlier.

GRAIN SORGHUM ... prices at the farm for October-December averaged 6¢ per cwt. above a year earlier reflecting the record exports. Market prices in January were around 15¢ per cwt. above a year earlier. Stocks of 462 million cwt. on January 1 were 16 percent less than last year. Of the total stocks, CCC owned around 162 million cwt. compared with 276 million a year earlier. Exports of 42 million cwt. the first quarter were the largest of record and compare with 28 million the first quarter of 1965-66. The quantity remaining for feed at 117 million cwt. was only slightly above a year earlier but 46 percent above average.

SOYBEAN ... prices at Illinois points for October through January averaged 34¢ per bushel above a year earlier reflecting in part continued record exports and crushings. Prices at these points in January were 11¢ above January 1966. Stocks of 725 million bushels on January 1 were 106 million more than a year ago. Crushings of 179 million, September through December, and exports of 109 million were both slightly above the record of a year ago. Through December 31 farmers had put 116 million bushels of 1966-crop soybeans under price support as against 67 million a year earlier.

FLAXSEED ... averaged \$3.14 per bushel at Minneapolis the first part of January compared with \$3.15 in July and \$3.03 in January a year ago. Flaxseed stocks of 22 million are down one-third from a year earlier. Exports of flaxseed, July-December, of nearly 5 million were well above the 3.3 million exported the year before. Crushings of about 15 million compare with 11 million crushed the first half of 1965-66. Farmers put only 1.6 million bushels under price support by the end of December as against 8.5 million a year earlier.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.
